Cover Letter

Dear Hiring Manager,

I am excited to apply for the BI Developer position at IN TechNet Limited. With over 3.4 years of experience in business intelligence and data analytics, I have developed a strong expertise in Power BI, SQL, and Tableau, enabling me to design and deliver insightful, data-driven solutions that support business decision-making.

In my current role at Wipro, I have been instrumental in creating dynamic Power BI dashboards that enhance data visualization and reporting efficiency. My proficiency in DAX, Power Query, and SQL allows me to build complex data models, optimize query performance, and implement Row-Level Security to ensure data integrity and security. Additionally, my experience with Power BI Service, Tableau Server, and Azure Active Directory has equipped me to manage deployments, schedule data refreshes, and maintain seamless integration across platforms.

Throughout my career, I have collaborated closely with stakeholders to understand business needs, translating them into actionable insights through customized reports and dashboards. My ability to work with diverse data sources, including SQL Server, Excel, and cloud platforms, has enabled me to support cross-functional teams in financial technology, retail analytics, and operational performance tracking.

I am eager to bring my analytical mindset, technical expertise, and problem-solving skills to In TechNet Limited. I look forward to the opportunity to discuss how my experience aligns with your team's goals. Thank you for your time and consideration.

Best regards,
